1. Brief overview of this user guide

This guide is prepared to help you navigate through the Federal Tax Authority (FTA) website and successfully complete your Excise Tax registration form as well as to guide you on the amendment and de-registration processes. It is designed to help you:

- **create an e-Services account** with the FTA (you will need to do this before you can register for Excise Tax);
- **provide accurate answers** to the questions on your Excise Tax registration and amendments forms as well as the de-registration application by explaining what information you are required to provide; and
- **understand the icons and symbols** you might see as you complete the registration form.

You should find that setting up an e-Services account is similar to setting up the other online accounts that you hold. The Excise Tax registration form is also designed to be straightforward and wherever possible it will auto-complete information for you.

If you need help setting up your e-Services account or have questions on specific fields in the Excise Tax registration form, please contact us.

2. Creating and using your e-Services account

3. Overview on Account Admin, Online User, and taxable person account definitions and functionalities

Account admins (i.e. users who have already registered / wish to register the taxable person's account with the FTA's e-Services portal) can manage multiple tax accounts using a single email address or can assign many users to view or manage one taxable person's account.

For example:

- If many businesses are owned by a single entity/person and that entity/person wishes to have access to the tax accounts of all businesses using a single email address, then this can be done using this functionality
- If multiple online users need to have access to the tax account of one taxable person, then this can be done using this functionality

Definitions

The following definitions apply in the context of this functionality:

Term	Definition
Taxable person account	Any entity created for allowing the registration of a taxable person and or any other tax related activities.
Online user	users who have already registered with the FTA's e-Services portal.
Taxable person account dashboard	The dashboard which allows users to perform all tax related activities such as registrations, returns, payments, refunds etc.
Online user dashboard	The dashboard which allows an online user to add taxable person accounts and also perform actions, such as grant or revoke read and write access of taxable person accounts to online users.
Admin	The admin of the taxable person account is the online user who has actually created the taxable person account in the system (i.e. the online user who has created the taxable person profile on the e-Services system). Please note that only the admin of a taxable person account can provide or revoke access rights to other online users.
Access rights	Online users can either have read or write access to a taxable person account. Please note, at any point in time, ONLY ONE online user will have write access to a taxable person account.

Functionalities

The following sections describe the privileges of online users, account admins and taxable person accounts.

- **Manage multiple tax accounts using a single email address** to perform all tax related functions, such as registration, filing returns, making tax payments, requesting refunds, deregistering etc for multiple taxable person accounts using the same email address (i.e.

the same online user account)

- **Assign multiple online users to have access to a single taxable person's account.** The admin of the account can control the level of access i.e. read or write to be given to users. Multiple online users can have view access to a particular taxable person account, but only one user can have write access. By default, the write access rests with the account admin who is then free to assign it to another online user or to hire a tax agency
- **Appoint / dismiss tax agency** – Admins of taxable person accounts can assign a tax agency to assist them in managing their tax responsibilities. Approved tax agencies will need to share the designated online user account for the agency to the admin of the taxable person account. The account admin can then add the agency to the taxable person account and transfer the write access to the agency who in turn will hire a tax agent to work actively with the taxable person's account. The account admin is free to retake write access to the taxable person's account at any point in time without having to dismiss the tax agency

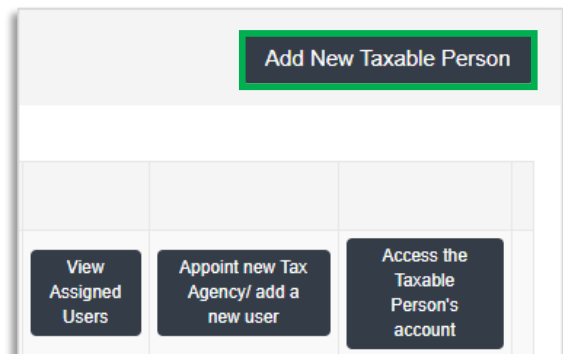

A summary of who has which access can be seen on the online user dashboard. The following sections describe how can an online user go about executing responsibilities for a taxable person.
